CAMELLIAS

To you who live in the northern section of the U. S. A. You can have Camellias too. They are easy to grow, just the same as other house plants, it takes time and care just the same as you give your other plants.

Keep plants well watered but not sloppy, if leaves on the plants turn yellow, try using rain water, and giving each pot plant three tablespoonfuls of sulphur. Sulphur makes the soil acid. Camellias with buds do not like to be in a room that is too hot, keep them where it will be about 45 to 50.

Here in the south we must not plant Camellias too deep, we always here at the nursery plant them one inch higher than they were grown in the nursery row.

Always pick a balled and burlapped camellia up by the ball of soil, never by the stem.

We plant on firm ground, and have the hole dug larger than the camellia ball, so that we can put plenty of good soil mixed with peat-moss around the plant, never under, as placing soft soil under a balled plant will let it settle later on and your plants will be planted too deep.

We leave the burlap on our camellias when we plant them.

Always water well when planting and during all dry weather the first year.

Camellias with scale or red-spider should be sprayed with Volck; using it at the rate of one to seventy-five.

We fertilize our plants early in the spring, in June and a light application in the fall.

If there is any information that we can help you with your plants, write, we are always glad to help.

YOU TOO—

Can pick lovely Camellias as the young lady is doing.

By letting Us help You make your selection. You are welcome to come and see the thousands of blooms here at our Nursery, any time, during blooming season.

First flowers begin to arrive in August, more and more keep coming until they are at their best in Dec. Jan. and Feb. We will have flowers up until about the first of April.

We are open for business from 7 a. m. to 5 p. m. on week days. No business on Sundays.

Abbreviations:

E—Early

M—Midseason

L—Late (Time of Blooming)

B-B—Balled and Burlap

First Release Of These New Camellias

HELEN K

A very beautiful new Kahn seedling. The Flower is 4 to 4½ inches, is an incomplete double with golden stamens intermixed with the petals in the center of the flower, the color starts with whites or a delicate shade of pink at the base of the petal gradually getting darker toward the tip of the petal and ending with a pale lavender.

1 Year Grafts, 15 to 18 in.	\$20.00
1 Year Grafts, 18 to 24 in.	25.00
2 Year Grafts, 30-to 36 in.	40.00

CHARLES KAHN

This is a flashy Camellia and very popular with fanciers who have seen the bloom in the Kahn garden. An incomplete double, 4 inches wide and 2½ inches high. It has a white background with each petal bearing several bright red streaks with stamens intermixed with the petals, a fast grower and heavy bloomer over a long period.

1 Year grafts 15 to 18 in.	\$20.00
2 Year grafts 30 to 36 in.	35.00

MARGARET NOONAN

From the Duncan's Garden comes this beautiful incomplete double Camellia, which is 4 to 4½ inches with stamens intermixed with the petals, the petals having a light pink background heavily streaked with red and is a good companion for the Charles Kahn.

1 Year grafts 18 to 24 in.	\$20.00
2 Year grafts 30 to 34 in.	30.00

CHAS. TURNER

This is one of the famous Turner seedlings, is a large semi-double measuring 5 inches. The flower is a beautiful shade of dark red with a group of yellow stamens in the center, the flower is outstanding in form and color.

1 Year grafts, 18-to 24 in.	\$20.00
-----------------------------	---------

ROSE ANN

This is another Kahn seedling, being an irregular complete double, measuring 3½ inches wide and 2½ inches high, the coloring is a beautiful delicate shade of pink and shows a pale lavender at the tips of the petals and is similar to Debutante in construction.

2 Year grafts 24 to 30 in.	\$25.00
----------------------------	---------

BUDDY

This is a seedling from Azalea Glen Nurseries. It is a very unusual camellia and different in construction than most Camellias. The flower is not large, being 3 inches wide and 2 inches high, in a semi-double. The four inside petals come to a point at the tips forming a collar around the stamens, the other petals are round at the tips, the flower has three distinct rows of petals.

1 Year grafts 24 to 30 in.	\$20.00

GROWING GOOD AZALEAS

Azaleas will grow in the sun or in the shade, in the sun you will have brighter colors. Azaleas can be used as pot or tub plants, in sections of the Country where the weather man gives too much ice and snow, for out-side planting.

Azaleas like acid soil, they love peat-moss, use plenty of it in the planting soil, or around your plants when placing them in the lawn.

A mixture of Peat-Moss, leaf mold and cow manure makes a very good soil to use in planting Azaleas.

We fertilize our plants early in the spring, using cotton-seed meal, or any good Azalea fertilizer.

Keep well watered during all dry weather. For Scale and Red Spider, spray with Volck, using it, one to fifty. Plants can be dusted with sulphur for Red Spider.

Where there is any doubt if the soil is acid enough to grow good Azaleas, use, aluminum-sulphate in your soil at the rate of one quart to a bushel of soil. Common sulphur can be placed around the plants and help, there is no danger as to the use, it will help with red spider.

Prune or shear your plants just as soon as they are through blooming, to keep them in whatever form you desire.

INDICA AZALEAS

This is the large flowering variety that grows so well here in the South. You will find them growing at Birmingham, Memphis, Little Rock, Tyler and Houston, Texas.

They want plenty peat-moss used in planting and plenty of water during the summer.

Elegans, Pink
